

Cosmetic & Bodycare Industry

In the business of beauty, cutting-edge technology, top-quality products and expertise are essential in helping women to look and feel their best. At New Beauty Institute, owner Caree Ludwar and her team focus on all aspects of body and skin care, with revolutionary anti-aging and weight loss treatments producing amazing results.

With Spring just around the corner, New Beauty Institute is offering an incredible facial special, regularly priced at \$109, this treatment is available for just \$48. Specially designed for mature skin or normal skin that needs a boost, this unique treatment deeply exfoliates the skin and increases its natural ability to hold moisture.

Skin becomes smoother, firmer, tighter and younger looking after just one session, although five treatments are recommended for optimum results. At just \$48, this is an incredible value, as New Beauty Institute uses world-reknowned PRIORI skin care products for the facial treatment. Providing a whole new level of skin rejuvenation that is simply not available through other skin care brands, PRIORI is the most innovative source of anti-aging science and proprietary patented technology on the market worldwide.

Another great deal New Beauty Institute not to be missed is the Proellixe whole body vibration machine. This remarkable tool extremely popular for building muscle and tone, and New Beauty Institute is back to four machines in their larger premises. Right now, you can experience this amazing body remodelling and reshaping machine - which also enhances bone density - for just \$49 per month.

Caree and the New Beauty team are also thrilled to offer 'Fat-Melting Body Treatment.' Using low-frequency high focused ultrasound technology, the machine allows a pre-determined amount of energy to be focused onto fatty tissue. As the waves converge and accumulate, the cellular membranes are broken down and the inter-cellular fluids are released and naturally metabolized. Bottom line for you - up to 10 inches of belly fat gone. This machine is the upgraded cousin of the popular Condessa, and can treat more than one body part at the same time.

Caree states the results have been better than she imagined, so come in for a free consultation.

Whether you're a returning client or visiting for the first time, New Beauty Institute on Martin Drive, with it's wide range of wellness services, will help you look and feel like a whole new you.
