

# Institute New Beauty

Combining cutting-edge technology, top-quality beauty products and a dedicated, knowledgeable staff, Institute New Beauty is a favourite among women looking to look and feel their best.

Focusing on all aspects of body and skin care, including weight loss and nutrition as well as revolutionary anti-aging treatments you won't find anywhere else, the centre has built a reputation for producing amazing results, in a comfortable and caring atmosphere.

Owner Caree Ludwar and the New Beauty team are thrilled to welcome Dr. Bernice Brits, the centre's new Medical Director. Dr. Brits will continue her family practice here on the Peninsula and will be at the centre doing Botox and fillers regularly, adding to the centre's amazing range of services and procedures.

If you're a little hesitant to have Botox or fillers done, the Fibropen System is a great option. This safe and effective device uses radiofrequency technology directly inside wrinkles, causing fibroblasts stimulation, filling and revitalizing the area of concern.

Another great procedure that has seen exceptional results is the Titan, which delivers significant skin-tightening without the downtime or scars of surgery. Infrared light heats the dermis deep below the skin's surface, which stimulates long-term collagen growth and tightens any lack skin – especially turkey neck and jowels – after just a few treatments.

To battle unsightly sun spots, fine lines and wrinkles, Caree recommends the Pearl procedure, by Cutera. This safe, non-invasive procedure has been showing remarkable results since it was introduced at the centre, with very few patients requiring more than one treatment.

When it comes to looking and feeling your best, weight loss and slimming techniques that help women win the battle of the bulge are more popular than ever.

One of Institute New Beauty's signature treatments, Condessa, has become one of the most sought-after and effective slimming treatments on the Peninsula.

Using low frequency ultrasound technology, the machine allows a pre-determined amount of energy to be focused onto fatty tissue. As the waves converge and accumulate, the cellular membranes are broken down and the inter-cellular fluids are released and naturally metabolized.

The Proellix whole body vibration machine is another popular tool for building muscle and tone – and Institute New Beauty is back to four machines in their larger premises. Right now, you can experience this amazing body remodelling and reshaping machine – which also enhances bone density – for just \$49 per month.

And for the month of February, Caree is offering a special Valentine facial deal for just \$99 – regularly priced at \$249, this is a deal not to be missed.

If you've been looking for ways to look and feel your best, visit Institute New Beauty in White Rock for a free consultation, and see what a difference some care, pampering and revolutionary technology can make.
