

New Beauty Institute

After a long summer spent soaking up the sun, your skin might look and feel a little worse for the wear.

Thankfully, White Rock's New Beauty Institute has just what you need to refresh and rejuvenate your skin.

Known as a Hydra Facial, this resurfacing procedure is known as a particle-free microdermabrasion that uses water instead of harsh crystals. The patented Vortex Technology cleanses, exfoliates, extracts and hydrates simultaneously, leaving the skin soothed, moisturized and enhanced without any irritation.

Ranked high among procedures for facial rejuvenation, the Hydra Facial is a non-invasive, non-surgical procedure that delivers instant results with no downtime.

"Every day I hear clients saying it is the best facial cleaning they've ever had," said New Beauty owner Caree Ludwar.

If it's skin laxity that you need to address, New Beauty offers a revolutionary age-defying treatment known as Ultherapy.

This cutting-edge, non-surgical procedure targets the deep, structural skin tissues where collagen is found. When ultrasound is directed below the skin surface to the layer called the dermis, it disturbs that layer with its vibration and a low level of heat. This causes it to react by producing more collagen and tighter new skin cells.

Ultimately, more collagen means a reduction in the rate of your skin's aging. This can provide a soft and subtle uplift to the chin, jowl and brow. Décolleté, elbows and knees, and the derriere are three of the most popular "trouble spots" that our patients target with this treatment.

Ultherapy achieves the same skin-tightening as a surgical facelift in just one treatment, without disturbing the surface of the skin and with no recovery time.

In addition to these revolutionary beauty treatments, Caree is thrilled to be celebrating three years of CoolSculpting treatments.

Producing "phenomenal" results in trouble spots such as muffin tops and love-handles, CoolSculpting is a body contouring treatment that precisely targets the stubborn fat you want to lose with undeniable results after just one treatment.

With results that have exceeded their expectations, Caree and her master certified staff have performed more CoolSculpting treatments than anyone else in Canada.

New Beauty Institute is pleased to offer complimentary consultations for all their services. To receive more information on the treatments described above or the other services that are available please check out our website www.new-beauty.ca or contact our offices at 604.541-8750.
